PROGRAMMING PROFESSOR

SuperProf.com | 03/2021 - PRESENT

Córdoba, Argentina

One of my dreams in childhood was to be a professor. In 2021 I dedicated almost a year teaching different languages like C#, Java, JavaScript, MySQL, Angular.

I did and taught two courses in the year in Angular and JavaScript.

I taught more than 100 students on the platform. It was a really nice experience, to be in this role.

C# DEVELOPER

Subadra Consulting Ltd | 03/2020 - 11/2020

Auckland, New Zealand - Temporal Contract

I develop an IMAP mail server. I had to integrate this server with preexistent software, where the main module was a POP3 server. An IMAP server can handle access to multiple clients to their own mail and make the correct synchronization. The communication between clients and server is with commands and the client can manipulate mails in the server. The server was implemented in .NET C#, and I have to use asynchronism with tasks, to give the capacity to handle multiple clients.

This was a challenging project because IMAP protocol is one of the biggest and difficult protocols on the Internet.

CEO | FULL STACK C# DEVELOPER

Smart-Soft – Software Development | 02/2017 - 02/2020

Córdoba, Argentina

I developed different applications most of them in WinForms C#. The most significant project was a full administrative desktop application that acts like a server that allows automatic text messages (SMS) to be sent using one or several USB GSM modems. Multithreading was used to make it possible that several simultaneous campaigns could be running at the same time. We use embedded database in SQLite. Development under Agile Methodology - Scrum. Jira tool was used

Software Development

JAVA DEVELOPER

Hewlett Packard Enterprise | 05/2015 01/2017

Córdoba, Argentina

Development and maintenance of software projects using the Java language for the American Airlines account. Management of the logical business capacity of Flight Booking Software. Programming and maintenance of web services with Java applying the SOAP protocol. File management on Linux Servers, using SSH terminal. MySQL Database Management. Development under Agile Methodology - Scrum.

EDUCATION

INFORMATION SYSTEMS ENGINEERING

National Technological University (UTN) 2012/2019

In 2019 I graduated as Information Systems Engineer from the UTN of Córdoba. The Information Systems Engineer is a professional with a solid analytical background that allows the interpretation and resolution of problems through the use of information processing systems and technologies.

The scope of responsibilities in systems engineering:

- Systems operations
- Systems performance –
- Testing, analysis, and retesting –
- Manufacturing
- Training and supporting
- Scheduling
- Cost analysis
- Proper disposal of inefficiencies
